

## Owens Corning INFLOW Vent

Properly ventilating your attic is one of the best ways to increase the longevity and performance of your roof. As part of a VentSure® Balanced Air Ventilation System of intake and exhaust, the VentSure® InFlow® Vent helps reduce heat and moisture buildup that can lead to ice damming and roof deterioration. The InFlow® Vent is an ideal solution for roofs without soffits or used as a supplemental intake on roofs requiring additional ventilation. Keeping your attic well-ventilated may even reduce your energy costs.\*
