A Grand Sequoia Makeover!

One of our Contractors, Jeff Swinger, sent us these awesome before and after pictures from a project they upgraded to GAF Grand Sequoia. What an improvement! If you would like to showcase any of your work, feel free to send us the before and after pictures for our next newsletter!

Before

After

Be one of the first to sell at least 100 Squares and win a Traeger Grill or \$750 retail value in Makita tools of your choice!

Pinnacle® Sun Shingles

Pinnacle® Sun shingles are more than just a cool roof solution. With the incorporation of both 3M™ Scotchgard™ Protector and reflective granules, Pinnacle® Sun shingles offer a complete roofing system that not only keeps your home cool, but also fights against unsightly algae growth that can hinder the reflective abilities of the shingles over time.

Driftwood SRI 18 Coastal Cliffs SRI 17 Coral Canyon SRI 17

We have these three colors on the way. The SRI ratings allow for cooler roofs which in turn help keep the properly vented attic cooler and the A/C working much more efficiently. The results can be lower utility cost based on today's utility cost. Future cost increases can improve the overall savings for years to come.

Harness the Power of the Sun

Pinnacle® Sun shingles are manufactured to reflect the sun's radiant heat away from the roof, decreasing cooling needs and increasing the overall energy efficiency of the home. The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere, and Pinnacle® Sun shingles are produced to meet the Cool Roof Rating Council's standards for SRI and may comply with city and state building codes for reflectivity.

Inspired by the Power of Trees

Create a smog-fighting surface on your roof. Patented 3M™ Smog-reducing granules are formulated with a photocatalytic coating that, once activated by sunlight, transforms smog into water-soluble ions, helping to improve air quality. With 3M™ Smog-reducing granules, an average-sized roof has the smog-fighting capacity of 2-3 trees, helping to remove smog pollutants, one roof at a time.

Only inventory on hand qualifies for our promotion. Special order colors do not apply.

NTRCA Events

In May, we hosted NTRCA and PolyGlass for Fundamentals of Torch Down Training. Thank you to the trainers and participants for this educational event.

Upcoming Events
